PART - V

GENERAL

33. General Eligibility.- (1) No electrical contractor shall be eligible to be in possession of more than one licence of any class at any given instant in his personal name. Where an electrical contractor so desires to either possess a licence in any other class other than what is in his possession, he/she shall surrender the licence already granted, in lieu of his application for a new one.

(2) No authorities of Industrial undertaking holding Special wiring permit shall be in possession of more than one Special wiring permit at any given instant in their firm name.

(3) No Electrical supervisor or wiremen permit holder shall be eligible to be in possession of more than one permit at any given instant in his name. Where a permit holder so desires to possess a permit other than that is in his possession, he shall surrender the permit already granted, in lieu of his application for a new one.

(4) No permit holder, being an employee of the State or Central Govt., or public sector undertakings or private limited company or aided institutions either permanent or temporary, shall utilize their permit for any firm or company holding Licence or Special wiring permit other than their own organization.

34. Issue of Duplicate Licence, Special Wiring Permit Permits etc.,-(1) Duplicate Licence or Special wiring permit or Electrical supervisory certificate of competency or certificate or permit may be issued to the applicant subject to furnishing of necessary documents, namely:-

(2) The application for issue of the above shall be accompanied by the following, namely:-

- (a) Copy of the police complaint lodged for the loss of the document.
- (b) Copy of the Licence or Special wiring permit or Electrical supervisory certificate of competency or certificate or permit as the case may be.
- (c) An affidavit sworn before the notary in the form as per Affidavit-4.
- (d) Original Treasury challan or cash receipt for having remitted the requisite fee as specified in the Annexure-5.
- (e) Specimen signature and three recent passport size photograph clearly showing the complete face and two ears of the applicant. The Specimen signature and photograph shall be got attested by the officer of the Electrical Inspectorate not below the rank of Deputy Electrical Inspector or by the Notary.

(f) A self-addressed envelope duly affixed with requisite postage stamp.

35. Endorsement of Permits to the Licence and Special Wiring Permit.- (1) Where a permit holder, not being a Licenced Electrical Contractor desires to supervise or to carry out the electrical works undertaken by a Licenced Electrical Contractor or Special Wiring Permit holder either as a Supervisor or Wireman, he shall do so only after his permit is endorsed to the Licenced Electrical Contractor or to authorities of Industrial undertaking holding Special wiring permit who has undertaken that electrical works.

(2) In the case of Licenced Electrical Contractor himself being a permit holder desires to supervise or to carry out the electrical work undertaken by him either as a Supervisor or Wireman, he shall do so only after endorsing his permit to his own Licence.

(3) Where the permit so required under sub-rule (1) is presented for endorsement, both the Licenced Electrical Contractor or authorities of Industry holding Special wiring permit and the permit holder shall furnish the requisition in the proforma as per Form X enclosing the requisite fee remitted Treasury challan as per Annexure-5, Licence/Special wiring permit and permit in original, to the designated office of the Department of Electrical Inspectorate to obtain the entries of the endorsement in the Licence/Special wiring permit and permit as well.

(4) Where a Licenced Electrical Contractor or authorities of Industry holding Special wiring permit or a permit holder whose permit has been endorsed to the Licence or Special wiring permit, desires that the endorsements needs to be cancelled, requisition for the same shall be forwarded in the proforma as per Form Y along with the requisite fee remitted Treasury challan as per Annexure-5, Licence or Special wiring permit and permit in original to the designated office of the Department of Electrical Inspectorate to obtain the entries of the endorsement in the Licence or Special wiring permit and permit as well.

(5) Where either the permit holder or the employing Licensed Electrical Contractor or authorities of Industrial undertaking holding Special wiring permit desires such cancellation and one of them refuses to sign the required proforma in Form Y an affidavit sworn before the Notary may be considered as sufficient for effecting cancellation of the endorsement. The person making the application shall remit the fee as per Annexure-5 in such a case and shall give not less than thirty days notice to the other person before cancellation of endorsement.

(6) The Chief Electrical Inspector to Government or designated officer cause notice to be issued to effect necessary entries in the licence or Special wiring permit or permit,-

(a) to the Licenced Electrical Contractor or to the authorities of Industrial undertaking holding Special wiring permit to employ and endorse another Supervisor or Wireman as the case may be, before the electrical works being executed is to be continued; or

(b) to permit holder to supervise or to carry out any electrical work.

(7) Where either a Licenced Electrical Contractor or authorities of Industrial undertaking holding Special wiring permit or the permit holder as the case may be desires for cancellation of the endorsement and where the electrical works being executed is to be continued, the Licenced Electrical Contractor or authorities of Industry holding Special wiring permit shall arrange to endorse another permit/s before the electrical works being executed is to be continued.

(8) Where any permit holder has endorsed his permit to a particular Licenced Electrical Contractor or authorities of Industry holding Special wiring permit he shall not work for any other Licenced Electrical Contractor or authorities of Industrial undertaking holding Special wiring permit or firm or company other than the one for whom the permit is endorsed.

(9) Electrical Supervisors and Wiremen employed under a Licenced Electrical Contractor of Super Grade **and Class I words omitted [vide Go No EN 96 EBS 2007 Dated 26.02.2013]** or authorities of Industrial undertaking holding Special wiring permit are not eligible to work for any other Licenced Electrical Contractor or authorities of Industrial undertaking holding Special wiring permit, therefore they shall not endorse their permit to any other Licenced Electrical Contractor or authorities of Industrial undertaking holding Special wiring permit or firm or company other than the one for whom the permit is endorsed.

(10) In respect of the other Supervisors and Wiremen, endorsement to more than one Licenced Electrical contractor of **class I words inserted [vide Go No EN 96 EBS 2007 Dated 26.02.2013]** Class 2 and Class 3, may be permitted as per the decision of the Board. However, such endorsement shall not exceed **FIVE is substituted in place of THREE [vide Go No EN 226 EBS 2014 Dated 27.02.2015]**.

(11) All the endorsement or cancellation shall be effected at the designated offices of the Electrical Inspectorate in whose jurisdiction the Supervisor / Wiremen is located.

36. Change of Authorised Signatory, Address, Partners / Directors and instruments.- Any change of address or change of partners or directors or authorized signatory or change of instruments may be effected in the original records of licence / permit holder subject to all necessary documents being furnished. The application for the above, addressed to the Member Secretary, duly signed by the applicant, shall be submitted at the office of the Chief Electrical Inspector to Govt., Bangalore accompanied by the original licence / permit and Treasury challan for having remitted the requisite fee as specified in Annexure - 5.

37. Violations.- (1) Whenever it appears to the Board that any licensee or authorities of Industrial undertaking holding Special wiring permit or permit holder,-

- (a) has violated any provisions of these rules;
- (b) has violated any of the terms and conditions of the licence or Special wiring permit or permit;
- (c) has misrepresented to any authority, organization or to any person with regard to licence or Special wiring permit or permit holder either before or after obtaining the same;
- (d) has misbehaved with any officers or officials, or has been convicted by a court of law or black listed by any Government undertaking in relation to electrical works;
- (e) has played fraud or misrepresented for obtaining licence or Special wiring permit or permit;
- (f) is declared bankrupt or insolvent, by the appropriate authority or wound up dissolved, or partitioned;
- (g) has wrongly represented to any authority with regard to the electrical installation work carried out by him;

The Board may suspend licence / Special wiring permit/ permit, as the case may be, by pending enquiry in to alleged contravention of any of the rules for a period which may be upto the period of validity of licence / Special wiring permit / permit. Such an order may be passed by the Chairman if he is prima facie of the view that the licensee / authorities of Industrial undertaking holding Special wiring permit / permit holder is guilty of an offence. The period of such suspension shall not exceed three months.

(2) Where the licence / Special wiring permit/permit is suspended, the licensee / authorities of Industrial undertaking holding Special wiring permit / permit holder shall not carry out any work until the suspension is revoked by a separate order as per the decision of the Board.

(3) The Chairman may order for an enquiry by the officer of the Electrical Inspectorate not below the rank of Deputy Electrical Inspector and place before the Board the enquiry report. Based on the

enquiry report the Board may cancel the licence / Special wiring permit / permit for a minimum period of THREE years or revoke the suspension. Further, to revoke such suspended licence / Special wiring permit / permit, he shall make a representation to the Board enclosing the order of the Board:

Provided that, no licence or Special wiring permit / permit shall be cancelled, except after giving the licensee / authorities of Industrial undertaking holding Special wiring permit / permit holder, an opportunity of making representations.

(4) Where the licence / Special wiring permit or permit is cancelled, the licensee / authorities of Industrial undertaking holding Special wiring permit / permit holder shall not be eligible to carry out any work until the cancellation is revoked by a separate order as per the decision of the Government or the Board.

(5) Further, to revoke such cancelled licence or Special wiring permit or permit, he shall make a representation to the Board enclosing the order of the Government or the Board. The Board may revoke the cancelled licence or Special wiring permit or permit.

38. Appeals.- (1) any person aggrieved by the order of the Board, may appeal to the Government of Karnataka, Department of Energy, within a period of Thirty days from the date of receipt of the order by him.

(2) The order of the State Government shall be final.

38A. Removal of difficulty:- if any difficulty arises in giving effect to the provisions of these rules the state Government may by order remove such difficulty not inconsistent with the provision of these rules.

Provided that no such order shall be issued after expiry of two years from the date of commencement of the Karnataka (Licensing of Electrical Contractor and grant of certificates and permits to Electrical Supervisors and Wiremen) (Amendment) Rules 2015. [inserted vide Go No EN 226 EBS 2014 Dated 27.02.2015].

39. Repeal and savings.- (1) The Karnataka (Licensing of Electrical Contractor and grant of certificates and permits to Electrical Supervisors and Wiremen) Rules, 1976 are hereby repealed.

(2) Notwithstanding such repeal,-

(a) all Licences or Special wiring permit or permits granted under the repealed rules shall be deemed to be valid till the date of Expiry, the renewal of which is subject to fulfilling of the conditions of licenses under these rules.

Provided that, the class I licensed electrical contractors who are executing electrical installation works of the voltage grade under super grade class licenses who shall surrender the license upon obtaining super grade license within the period not exceeding ninety days failing which it shall be deemed to be violation within the meaning of these rules.

(b) the Supervisor permits / Wiremen permits granted under the repealed rules shall be deemed to have been granted with permits of Grade 2 as per these rules.

(c) such of the Supervisor in possession of a valid permit under the repealed rules, supervising the Electrical works of voltage class in excess of 33 kV, shall obtain the Electrical Supervisor (General) Grade 1 permit , if eligible, duly complying with these rules within a period not exceeding ninety days from the coming into effect of these rules.

(d) all the candidates declared to have been passed the examination conducted by the Board under the repealed rules shall be deemed to have passed the examination under these rules to be eligible to be granted with permits of grade 2 in respect of such candidates who are yet to be granted with such permits.

AGREEMENT

(IN ACCORDANCE WITH THE RULE AND CONDITIONS FOR GRANT OF LICENCE FOR ELECTRICAL CONTRACTOR.)

An agreement made on this. day of the month of the year between M/s./ Shri/ Smt. herein after called as the prospective consumer (with expression wherever context call as the prospective consumer (with expression wherever context so admits shall include his/her succession and assigns) of the one part and M/s. /Shri/ Smt.... . . hereinafter called the Licenced electrical contractor (which expression wherever context so admits shall include his/her successors and assigns) of the part.

WHEREAS at the request of the prospective consumer, the Contractor has agreed for the execution of electrical work at door No. Street. Town or Village. Subject to the following conditions and also to complete and handover the same to the consumer along with the test and completion report in satisfactory and work man like manner in accordance with the relevant rules in force on or before day. of (the month) the year.

NOW THIS AGREEMENT WITNESS AS FOLLOWS

1. In this agreement unless the context otherwise required rules mean the following rules as amended from the time to time.
 - a) (i) Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulations, 2010,

(ii) Karnataka Cinemas (Rule) Rules, 1971 and The Karnataka Exhibition of films on TV screen through VCR and Laser Disc Rules, 1984.

(iii) The Karnataka (Licensing of Electrical Contractor and Grant of certificates and Permits to Electrical Supervisors and Wireman) Rules, 2012.

b) B I.S. means Bureau of Indian Standards

c) Supply Authority means any Licensee who has undertaken to supply energy in the areas.

2. A copy of the estimate with specifications of the materials to be used and agreed rates and the probable total cost of the work shall accompany this agreement duly signed by the prospective consumer and the contractor.
3. The contractor shall not petition for the revision of rate mentioned in the estimate (Under item 2) under any circumstances under any stage of work during the period of contract unless mutually agreed upon by the contractor and consumer in writing.
4. The contractor shall adopt any alteration or additional at the request in writing of the consumer of the consumer at least three days in advance to such alteration or addition. Rates for such alteration addition, if not covered in the estimate shall be mutually agreed upon in writing.
5. All amounts received towards the works by the contractor shall be acknowledged on receipt only. Such receipt shall be preserved by the consumer. Copies of such receipts shall be preserved by contractor.
6. The contractor may extend the period of contract for the completion of the work with the consent of the consumer in writing stating clearly the period of extension agreed under intimation to the supplier..
7. If the delay is caused due to unsatisfactory progress of civil work such delay caused shall be immediately intimated by the contractor to the consumer and the supplier in writing and further extension of period for completing the wiring work will be decided upon, in consultation with the contractor. Should thereby variation in the market prices of Electrical materials during the extended period, the variation of rates in the estimates shall be fixed as agreed to by both the parties.
8. The contractor's shall get the work done only through authorized wireman, under direct supervision of authorized supervisor under his employ holding valid permit and certificate of competency issued by the Board.
9. The contractors shall use materials confirming to the BIS standard or other equivalent standard and execute the works in sound substantial and workmen like manner as per rules prescribed under 1(a)
10. The contractor shall stand guarantee for a period of one year from the date of service for any defect in the installation which may appear due to bad workmanship during execution and replace any defective materials and rectify the defects of bad workmanship free of cost during the guarantee period.
11. (a) The consumers shall enter into an agreement with the supply authority and pay all the required deposits towards the service mains, supervision charges monthly minimum, etc,. to the supply authority with out undue delay to facilitate the contractor to get the installation serviced.

(b) The contractor shall not be responsible for the delay in servicing the installation, provided that the completion report has been handed over to the consumer in advance before the expiry date of the agreement period.

12. In case of a difference or dispute between the contractor and consumer during execution of work regarding the quality of materials or workmanship, the same shall be referred to the Chief Electrical Inspector to Govt. Bangalore, by either party giving seven days clear notice of his intention to do so to the other party.

13. The Chief Electrical Inspector’s decision regarding dispute in quality of the material used and workmanship shall be final.

14. (a) The consumer shall enclose a copy of this agreement along with the application to the supplier for power sanction.

(b) The contractor shall intimate the concerned jurisdictional supplier not below the rank of Junior Engineer and for the works to be inspected and approved by the Electrical Inspectorate authority to the jurisdictional Electrical Inspectorate authority in the prescribed Form ‘A1’ within 48 hours of the commencement of work

An amount of Rs.... . in words.... . is paid to the contractor as initial advance towards the said contract at the time of signing this agreement and further payment shall be made as mutually agreed upon.

Signed and sealed by the said parties of the month. of year.

GOVERNMENT OF KARNATAKA

CLASS 3 ELECTRICAL CONTRACTORS LICENCE
(Rule – 12 & 12(2) (d)

CHIEF ELECTRICAL INSPECTOR TO GOVT
AND EX-OFFICIO ADDL. SECRETARY
(ELECTRICAL LICENSING) DEPARTMENT
OF ENERGY BANGALORE.

Inside of Cover

Licence No L 3

Specimen signature of the Licencee

First page:

Government of Karnataka
CHIEF ELECTRICAL INSPECTOR TO GOVT
AND EX-OFFICIO ADDL. SECRETARY
(ELECTRICAL LICENSING) DEPARTMENT
OF ENERGY BANGALORE.

Licence No L 3

Date of issue.

Valid up to

Name and Address firm
. Rs
. paid vide Challan No. Dated.

In exercise of the powers conferred by rule 12(2) (d) of The Karnataka (Licensing of Electrical contractors and grant of certificates and permits to electrical supervisors and wiremen) Rules, 2012,

Mr. / Messrs. is/are hereby authorized to carry out, Electrical Installation work in the State of Karnataka subject to the conditions mentioned in the Karnataka (Licensing of Electrical contractors and grant of certificates and permits to electrical supervisors and wiremen) Rules 2012, and Issued by the Government of Karnataka under Government Notification.

CHIEF ELECTRICAL INSPECTOR TO GOVT
ANDEX-OFFICIO ADDL. SECRETARY
(ELECTRICAL LICENSING) DEPARTMENT
OF ENERGY BANGALORE.

CONDITIONS

1. This Licence must be got renewed and must be produced on demand by the Officer of the Electrical Inspectorate, Government of Karnataka or to any authorities of the supplier having jurisdiction over the area where the electrical installation work is being carried out.
2. This Licence is valid for carrying out the following nature of electrical installation:-
Low voltage Electrical Installation works only.
3. The holder of this Licence shall send intimation to the Member Secretary, Licensing Advisory and Examinations Board in Writing within seven days as to very change of:
 - a. Address of the place of business-
 - b. Authorized signatory (in case of a limited Company and partner ship firm)
 - c. Testing Instruments and
 - d. dissolution of partnership etc.
4. The Licencee shall always keep and maintain the following instruments:

Testing Instruments

 - a. Insulation Tester (500 V class
 - b. Portable Voltmeter - range 0 to 600 volts.
 - c. Portable Ammeter – range 0 to 60 A.
 - d. Multi meter
 - e. Tong Tester

Safety Tools and other Equipments:

 - a) Rubber hand gloves tested to 15 kV (Electrical grade)
 - b) Wire gauge or micrometer

and Library for relevant Acts, rules and BIS publications
5. The Licencee shall himself hold certificate of competency and valid Electrical Supervisor permit issued by the Board or employ supervisor holding competency certificate and valid Electrical Supervisor permit issued by the Board and endorsed to his firm. Hence shall maintain “Attendance Register”. in form E1
6. The Licencee shall get the work done only through the Wireman holding valid wireman permit issued by the Board under direct supervision by the Supervisor and. endorsed to his firm. Hence shall maintain “work allocation Register”. in form F1
7. Every work undertaken by the Licencee shall be evidenced by a written agreement with the person concerned. The wiring and other materials used by the Licencee for the work executed shall conform to the standards approved by BIS. Hence, shall maintain (a) Application Register in form D1, (b) Material Issue Register in form G1 and (c) Copies of estimates and agreements in form Z duly signed by the Licencee and the consumer concerned.
8. The Licencee shall intimate the the jurisdictional officer of the supplier not below the rank of Junior Engineer / Electrical Inspectorate Officer before undertaking the execution of any work in Form A1 append to the Rules, and also the completion of such work within three days from the date of completion of such work.
9. The Licencee shall afford all facilities to the Electrical Inspector or any person authorized by him in writing to inspect at all times any work under execution.
10. The Electrical Inspector may, if in his opinion the work under execution is likely to cause danger to the life or property of the consumer or any other person, direct to stop the work and rectify the defects. The Licence shall comply with such direction.
11. The Licencee shall at all times ensure safety to the public.
12. The Licencee shall be bound to comply with the provisions of the Electricity Act, 2003, Central Electricity Authority (Measures relating to safety and Electric supply) Regulations, 2010, any rules and regulations made thereunder, and the Karnataka (Licensing of Electrical contractors and grant of certificates and permits to electrical supervisors and wiremen) Rules 2012.

Conditions

1. This Special wiring permit, if necessary, shall be got renewed by the Management.
2. This permit must be produced on demand by the Officer of Electrical Inspectorate, Government of Karnataka to any authorities of the supplier having jurisdiction over the area where the electrical installation work is being carried out..
3. This permit is valid for carrying out all type of Electric installation, corresponding to the class of voltage of their installation viz, Extra High Voltage, and High voltage Electrical installations.
4. The management holding this Special wiring permit shall send intimation to the Member Secretary, Licensing Advisory and Examination Board, in writing within seven days in case any change of
 - Address of the place of business
 - Manager / Authorized signatory
 - Testing instruments
 - Dissolution of partnership etc
- 5 The management holding this Special wiring permit shall always keep and maintain the following instruments depending on the class of voltage of their Electrical installation
 - a) For above 33 kV installation
 1. Insulation Tester
 - a) 5000V (b) 1000V (c) 500 V class each
 2. Portable Voltmeter - range 0 to 600 volts.
 3. Portable Ammeter – range 0 to 60 A.
 4. Multi meter
 5. Tong Tester
 6. Earth Tester with testing accessories.
 7. Phase sequence meter
 8. Portable Frequency meter range 45 to55 HZ
 9. Portable PF meter 5Amps, 240V, A/C.

Safety Tools and Equipments:

 1. Rubber hand gloves tested to 15 kV (Electrical grade)
 2. Safety Belt
 3. Full harness belt
 4. Wire gauge or micrometer
 5. Hand operated and hydraulic operated crimping tool.
 6. Welding generator set.
 7. Portable grinder
 8. Portable drill

9. Rollers for cable laying
10. Cable drum lifting jacks
11. Blow lamp for cable jointing
12. Hole saw cutter
13. Torque wrinch spanner
14. Come along clamp
15. Chain pulley
16. Manela rope

and Library for relevant Acts, rules and BIS publications

b) For 33 kV and below voltage installation;

- 1 Insulation Tester
 - a) 1000V (b) 500 V class each
- 2 Portable Voltmeter - range 0 to 600 volts.
- 3 Portable Ammeter – range 0 to 60 A.
- 4 Multi meter
- 5 Tong Tester
- 6 Earth Tester with testing accessories.
- 7 Phase sequence meter

Safety Tools and Equipments:

- a) Rubber hand gloves tested to 15 kV (Electrical grade)
- b) Safety Belt
- c) Wire gauge or micrometer

and Library for relevant Acts, rules and BIS publications

6 The management holding this Special wiring permit ;

- a) shall employ supervisors holding certificate of competency and valid Electrical Supervisors Permits issued by the Board. shall get the work done only through the wiremen under their employ holding valid wiremen permits issued by the Board under the direct supervision by the Supervisors.
- b) shall afford all the facilities to the Chief Electrical Inspector to Govt or any person authorized by him in writing to inspect at all times any work under execution.
- c) shall all time ensure safety to the employees and the public.
- d) shall be bound to comply with the provisions of the Electricity Act, 2003 Central Electricity Authority (Measures relating to safety and Electric supply) Regulations, 2010, any rules and regulations made there under, and the Karnataka (Licensing of Electrical contractors and grant of certificates and permits to electrical supervisors and wiremen) Rules 2012.

ANNEXURE - 1

(Rule 20 and 24) Electrical

Supervisor Examination

Syllabus for Examination of Electrical Supervisory Certificate of Competency- Electrical Supervisor (General Grade 2)

Paper - I

Electricity- Theory (Elementary Knowledge)

1. Principles of Electricity

Electric pressure, current and resistance – Ohm's Law, Kirchhoff's Law, specific resistance, laws of resistance and their application for calculating voltage drop-series and parallel circuit – simple problems. Practical units of voltage, current, resistance, power and energy. Relation between electrical power unit (kW) and mechanical power unit (HP). Inductance, capacitance, reactance and impedances. magnetic, chemical and heating effects of electric current.

2. Electromagnetism

Flux flux density – magnetic field strength, permeability – flux distribution due to straight conductor and circular loop – magnetic circuits – reluctance – calculation of MMF – effect of air gap – hysteresis loop of magnetic materials – force acting on a current carrying conductor – lifting power of a magnet.

Electro magnetic inductance – production of EMF – Flemings HandRules – Faraday's and Lenz's Law – statically and dynamically induced EMFs – self and mutual inductance – coupling coefficient. Magnetic properties of materials – electro magnets and their applications.

3. Materials

Conductors, non-conductors and insulators – insulating materials and their relative merits – transformer oil – effect of heat and moisture on insulation – lubricants and their uses – dielectrics – dielectric strength – permittivity.

Different types of wires, cables, switches, circuit breakers, fuses and their safe current carrying capacity. Use of tables and data sheets generally given in electrical hand book.

4. Generation of electricity

Methods of generation of electric power – Block schematic layout of generating stations – hydroelectric, thermal, nuclear stations. Non conventional energy sources – solar, tidal and wind power. Economics of generation – load factor, diversity factor, plant factor.

5. AC Generators (Alternators)

Basic principle – details of construction and essential components – voltage Rule – methods of voltage Rule – synchronous reactance, Rule, methods of voltage control and frequency control – synchronizing of alternators – conditions and methods for synchronising – synchrosopes – bright lamp and dark lamp methods – simple associated switch board and its accessories.

6. DC Generators

Basic principle – essential components – details of construction – shunt, series and compound generators and their characteristics – causes of sparking interpoles, commutators and their maintenance – carbon brushes – their adjustment and care – voltage Rule – parallel operation of DC generators – shunt, series and compound. simple switch board and its accessories.

7. Batteries

Primary cells, dry cells, storage or secondary batteries – lead acid and nickel cadmium batteries– construction–characteristics– charging and discharging. charging circuits and their calculation– series and parallel circuits – specification – maintenance – use of hydrometers.

8. AC Motors

Rotating magnetic field – three phase induction motors – construction – principle of operation – speed – frequency – slip – types – star delta starting. single phase induction motor - construction – different methods of starting. squirrel cage induction motor – slip ring induction motor – construction. Methods of starting – slip torque – slip characteristics – no load and blocked rotor tests – efficiency – circle diagram and determination of characteristics – synchronous motors – general principle of operation – uses – installation – methods of starting and speed control and reversal of direction – commutator motors. Torque calculation and basic knowledge of variable voltage and variable frequency drives (VVVF).

9. DC Motors

Motor principle – series, shunt and compound wound type motors – their uses, installation – methods of starting – speed control – reversal of directions.

10. AC Circuits

Alternating current fundamentals – generation of alternating currents – waveform – frequency period – average value, rms value and form factor – different wave forms – phasor representation of alternating quantities – rectangular, polar and exponential forms.

Analysis of simple AC circuits with resistance, inductance and capacitance. Concept of impedance and admittance – phasor representation – 'j' notation. Power and power factor in ac circuits – active and reactive components. Solution of RL, RC and RLC circuits – series, parallel and series parallel circuits.

Three phase systems – star and Delta connection – relationship between phase and line values of voltage and current – phasor representation – solution of balanced and unbalanced three phase circuits – three wire and four wire systems – power in three phase systems – phase sequence – measurement of active and reactive power in single phase and three phase systems.

11. Switch gear and protection

Knowledge of various types of switches and protective fuses and circuit breakers like MCBs, ELCBs, ACBs, SF₆ breakers, etc, and cutouts, starters, regulators, protective devices for both AC and DC motors. Basic methods of transformer, generator, motor, and feeder protection. Thermal and magnetic releases – relays – IDMT, instantaneous type – over current, earth fault and earth leakage relays – time and current settings and their wiring with motors. Concepts, features and applications of static (electronic) relays, auto-reclosers, sectionalizers.

12. Transformers

Transformer – construction – use and maintenance – voltage and current relations – losses and efficiency – three phase transformer connections – star/star, delta/delta, star/delta, delta/star, V-V, T-T-Parallel operation of three phase transformers-Auto transformer – transformer tapings, temperature rise, automatic voltage boosters. Instrument transformers current transformers, potential transformers, ratio and phase angle errors, accuracy class (metering class, protection class etc.), polarity checking, CT and PT specifications.

13. Conversion

Principle of operation of motor – generator set, rotary or synchronous convertors, mercury-arc rectifiers, inverters, thyristors and other static devices. Battery chargers – voltage equation. Filtering – half wave – full wave and bridge rectifiers.

14. Transmission and Distribution

Bulk transmission of electric power – typical power transmission scheme – need for high transmission voltage. Sub-stations substation equipments – primary and secondary transmission and distribution systems – overhead lines – effect of power factor – general principles and simple problems. Line constants – determination of voltage drop – Rule. construction of lines of voltage upto 250 V and exceeding 250 V but not exceeding 33 kV, size of conductor, length of spans, sags, strength of poles, spacing of conductors, cross-arms, effects of temperature, wind pressure, ice and snow, tension of wire, insulators, brackets, stays, struts, guard wires, vibration dampers and other protective devices. Earthing – lightning arrestors and lightning conductors and their testing. Testing and fault location. Methods of working on overhead lines, equipment used for replacement of insulators, their ratings, methods of replacement of insulators, inspection of transmission and distribution lines. Concepts and advantages of 3-phase and 1-phase distribution systems of voltage exceeding 650 V but not exceeding 33 kV.

15. Underground cables

Simple calculations and general principles of laying Cables direct in the ground, in troughs and pipes, handling, bending, joining, plumbing, underground and above ground junction boxes. Distribution board and pillars. Joint box compound, melting of compounds and filling boxes with compounds. Testing and fault location – Murray Varley loop tests. Current rating – short time rating and continuous rating – derating factors of cables – basic knowledge of different types of cables – PVC, APVC, AYFY, XLPE – calculation of voltage drop.

16. Illumination and Street lights

Characteristics of different types of lamps – incandescent lamps, fluorescent lamps, vapour lamps – sodium and HPMV lamps – energy efficient lamps – luminous tube sign installations of voltage exceeding 650 V but not exceeding 33 kV. Photo metric units and simple measurements. General requirements of efficient lighting – simple problems on illumination. Street lighting-time switches. Different types of poles – swaged poles and step up poles. Different types of brackets – single upsweep, double upsweep, swan made type and 15° inclined with support. Lanterns – side entry/top entry lanterns, anodized parabolic reflector, POT reflector etc.

17. Electrical Safety Rules: Working knowledge of

- i. Wiring Rules
- ii. Protection and restoration of persons suffering from electric shock
- iii. Working on over head lines
- iv. Working in switch yard on voltage exceeding 650 V.
- v. Preliminary knowledge of Codes of Practices and Specifications prescribed by Bureau of Indian Standards.

Syllabus for Examination of Electrical Supervisory Certificate of Competency -
Electrical Supervisor (General) Grade 2

Paper - II

Electrical Energy Utilisation (Elementary Knowledge)

1. Design of electrical installations

a. Domestic Installations

Various systems of LT wiring – cleat, cable sheathed, wood casing and capping, metal sheathed, conduit and armoured cable for lighting and power in residential premises – types of wires and cables, standards sizes – estimates of material and cost of different types of installations – wiring of temporary installations together with necessary switchgear and portable appliances. Electrical wiring installations for large multi-storied residential buildings.

b. Industrial Installations

Load survey – connected load – maximum demand – demand factor – diversity load centre, selection of sub-station site – transformer capacity – selection of distribution voltage – main switch board – sub-switch board and distribution fuse board – MCC – PMCC – PCC – distribution layout – location of switch boards – fault level calculations – circuit diagrams.

2. Earthing

Resistivity of soil – measurement – computation of earth resistance – different materials used for earthing conductors – current densities – corrosion factors – determination of size of earth bus, number of earth electrodes – plate, pipe and strip electrodes – disposition of electrodes – joints in earth conductors – size of earth conductors for equipments of various capacities – earth continuity wire – earth continuity resistance – its Rules.

3. Selection of equipments

Different types of breakers – OCB – ACB – VCB – MCCB – MCB – contactors – breaking capacity – making capacity – selection of breakers – selection of switches – short time and continuous ratings – HRC fuses – uses – prospective currents – cut off values – selection of major and minor fuses – grading. Switch boards – design of outlets – fabrication – design parameters – FBARules. Cables – short time and continuous ratings – derating factors – design aspect of different types of cables. Hazardous areas. Motors – selection of starting methods of motors – DC motors – speed control – limitations on starting current and voltage drop – system disturbance. Motors of voltage exceeding 650 V but not exceeding 33 kV – protection – motor protection relays – capacitors – power factor improvement, selection. Methods of connection of Special type transformers – furnace transformers – welding transformers – rectifier transformers scott connection – tertiary windings. captive generation – determination of capacity – load segregation – double bus system – changeover arrangements – Indian Standards.

4. Energy measurements and tariffs

Measurement of Power – Wattmeters, Energy meters, Power factor correction by capacitors – Trivector Meters – Installation and Computation of energy – T.O.D meters. Tariffs – different types for LT and HT consumers – Simple calculations relating to cost of energy. – Concepts and features of electronic/digital metering

5. Installation, Testing and Maintenance

Insulation tester – earth tester – relay testing kit. Schering Bridge, Break down test of oil. Single phase and three phase energy meter testing, ammeter, voltmeter, wattmeter – different installation. Recommended values of insulation resistance – desired values. Polarisation index – earth resistance measurements – desired values. Polarity tests – test for earth continuity paths – rectification of faults. detection and location of faults in domestic appliances and wiring installations. Relay testing – maintenance of various electrical installations – relevant standards and Rules. Protective devices, basic knowledge of earthing of generators, motors, machines, installations and electrical appliances. Lightning protection – calculation of number of down conductors – test joint – lightning arrestors.

6. Cable Jointing

Aluminium and copper cable jointing – types – precautions – termination. Indian Standards.

7. Clearances

Statutory clearances of live parts from ground, buildings – sectional clearances – equipment clearances – clearance of switch boards – oil containing equipments – Indoor and outdoor equipment clearances.

8. Symbols.

List of symbols as per N.E.C – preparation of simple electrical wiring diagrams and electrical circuit diagrams – reading out simple electrical circuit diagrams.

9. Preparation of Schematic diagrams

Electrical connection for

1. DC and AC generators, switch board, transformers.
2. Main switch boards and sub-switch boards with circuit breakers, switch fuse units, with down stream load details in each circuit.
3. DC and AC motors, their starters, regulators.
4. Battery charging equipment.
5. Converting machinery.
6. Lifts with their safety devices.
7. X-ray.
8. Neon-sign.

10. Special Type of Equipments

X-ray, neon-sign, lift, cinema installations – relevant Rules – circuitry – safety precautions – earthing – fire precaution measures.

11. Energy Audit and Conservation-concepts and applications

12. SCADA systems and remote data acquisition and control general concepts and applications.

13. Rules and standards: Working knowledge of

1. Electricity Act, 2003.
2. Central Electricity Authority (Measures relating to safety and Electric supply) Regulations, 2010
3. Code of practice for Cinema and Lift and Escalators Installations.

ANNEXURE - 2

(Rule 24)

Syllabus for Examination of Electrical Supervisory Certificate of Competency -
Electrical Supervisor (Mines) Grade 2

PAPER - III

Mines Installations (Elementary Knowledge)

1. Wiring

Different types of wiring for power and lighting installations underground – different types of permissible types of cables to be used underground and in hazardous areas.

2. Preparation of schematic diagrams

1. DC and AC generators, switch boards, transformers etc.
2. Distribution boards with circuit breakers, switch fuse units with down stream load details in each circuit.
3. DC and AC motors with their starters and capacitors.
4. Battery charger and lamp cabin

3. Apparatus including flame proof apparatus for use in hazardous locations in coal and oil mines flame proof enclosures – general construction – rating plate and diagram of connections – rated voltage and frequency – rate outputs – rating of motors in flame proof enclosures – performance – temperature rise – tests for flame proofness.

4. Installation and maintenance of Electrical Equipments in Mines

1. General requirement of electrical equipment installed in mines – design – layout
2. Electrical protection of circuits and apparatus.
3. Protective measures against risk of electric shock.
4. Intrinsically safe apparatus and circuits.
5. Installation of electrical equipments.
6. Portable and transportable apparatus.
7. Cables.
8. Communication and signalling systems
9. Maintenance of electrical equipments in mines – Special precautions for maintenance of flame proof equipment – Special precautions for maintenance of intrinsically safe equipment
10. Installation and maintenance of:
 - a) Electrical winders, haulages and pump units, their control gears and starters.
 - b) Rectifiers, rotary converters and electric locomotives.

5. General principles and elementary knowledge of

1. Supply voltage for transmission, distribution and use underground
2. Control gear – transformers – insulated cables – cable terminal arrangement and sealing boxes – power distribution – motors and motor starters
3. Connected load – maximum demand – demand factor – diversity load centre

4. Power energy consumption in pumping, hauling and mining installations and other face machineries.
6. Power and energy measurement and tariffs

Measurement of power-watt meters – energy meters used in both DC and AC – power factor correction by capacitors – trivector meters – T.O.D. meters – their installation and computation of energy. Single and three phase static meters and principles of measuring energy consumption.

Tariffs – Different tariffs for LT and HT consumers – simple calculation relating to cost of energy.
7. Testing and fault attendance

Insulation tester – earth tester – relay testing kit – Schering Bridge, break down test of oil-single phase and three phase energy testing – voltmeter, ammeter and wattmeter testing – different installations – recommended values of insulation resistance – polarisation index – earth resistance measurements – desired values – Test for earth continuity paths – relay testing. detection and location of earth and faults in electrical apparatus and cables in voltage not exceeding 250 V and control circuits.
8. Flexing, trailing cables for portable and transportable apparatus. Knowledge of different types of cables including pliable armoured cables, their installation, maintenance, fault location, efficient repairs by vulcanized joints and testing.
9. Illumination, signaling and telecommunication system in Mines
10. Safety and protective devices
 1. Electrical protection of circuits and apparatus – protection against over currents – protection against earth leakage.
 2. Protective measures against risk of electrical shock – protection against contact with live parts – insulation resistance – protective earthing.
11. Safety Rules
 4. Working knowledge of Central Electricity Authority (Measures relating to safety and Electric Supply) Regulations, 2010, with particular reference to chapter X.

ANNEXURE - 3

(Rule 27)

Syllabus for Examination for Electrical Wiremen Permit Grade 2

1. Properties of copper and aluminium conductors. Properties of insulating materials such as PVC, XLPE, rubber and porcelain. Concept of voltage, current, power, energy, resistance, inductance, capacitance, impedance, power-factor. Simple calculation of current, power, energy and voltage drop. Comparison between series and parallel connection of loads.
2. Basic principle of bulk generation of electricity in hydel and thermal stations. Functions of sub-stations and transformer stations in power systems. Lead acid and dry type of storage batteries. constructional details, characteristics, charging and maintenance, tubular and maintenance free batteries.
3. Measuring devices. Principle of operation of voltmeter, ammeter, wattmeter, tong tester and multimeter. Measurement of energy in single phase and three phase circuits using energy meters. Checking of possible errors.

4. Transformers principle of operation, construction, KVA and current ratings – efficiency, care and maintenance. Induction motors. Principle of working of squirrel cage and slipring motors–starter, D.O.L., star/delta(semiautomatic and automatic) and rotor resistance types. Single phase motors principle. Different types of fan regulators –resistance and electronic types. Principle of operation of fractional horse power motors used in appliances such as mixies, washing machines, etc. Principle of operation of AC generators.
5. Various systems of LT wiring – types of wires and standard sizes – voltage and current ratings – thumbRules for voltage drop in cables. Main switch boards, sub switch boards and distribution boards – permissible loads – selection of location and standards clearances for main boards etc. Circuit breakers, MCCBs, switch fuse units, MCBs, etc standard ratings. Conduits – metallic and non metallic types – permissible numbers of wires in conduits. Wiring of Special equipments like UPS, invertors, standby for computers, etc. Essential factors for wiring high rise buildings.
6. Earthing of systems, necessity types of standards for earthing – selection of location – type and size of earthing conductors – minimum number of earth electrodes. Earthing of Special equipment.
7. Fuses, rewirable and HRC types – ratings, selection and grading. Circuit breakers – MCCB, MCB, Overload protection, Earth leakage protection – ELCB – principle of operation – standards leakage current ratings.
8. Principle of operation of invertors, UPS and electronic chokes, power ratings. principle of operation and characteristics of commonly used light sources such as incandescent lamps, fluorescent lamps, compact fluorescent lamps, vapour lamps.
9. Standard symbols of various types of electrical equipments – reading of schematic drawing for power and control circuits. Electrical workman tools and accessories.
10. Testing and commissioning of installations – standards, testing meters – insulation tester, earth tester, neon tester, hand held lamp tester. General knowledge of continuity and polarity tests in single phase and three phase wiring, insulation resistance and earth resistance test.
11. Safety measures to be observed while working – devices used for electrical workman safety. Knowledge on tariffs. Procedure for availing electric supply to consumer – submission of completion report. Energy efficient and trouble free maintenance of installations. Knowledge of energy conservation methods. Code of conduct and ethics to be observed by the electrical workman with the Contractor, consumer and the Regulatory Authorities. Protective measures against electrical shocks to working personnel, restoration of and first aid to persons sustaining electrical shocks.

ANNEXURE - 4

(Rule 12)

TESTING INSTRUMENTS, SAFETY TOOLS AND OTHER EQUIPMENTS REQUIRED TO BE KEPT AND MAINTAINED FOR OBTAINING ELECTRICAL CONTRACTOR'S LICENCES, SPECIAL WIRING PERMIT

a) For Super Grade: Testing Instruments

- 1) Insulation Tester
 - a) 5000V (b) 1000V (c) 500 V class each
- 2) Portable Voltmeter - range 0 to 600 volts.
- 3) Portable Ammeter – range 0 to 60 A.
- 4) Multi meter
- 5) Tong Tester

- 6) Earth Tester with testing accessories.
- 7) Phase sequence meter
- 8) Portable Frequency meter range 45 to 55 HZ
- 9) Portable PF meter 5Amps, 240V, A/C.

Safety Tools and other Equipments:

- a) Rubber hand gloves tested to 15 kV (Electrical grade)
- b) Wire gauge or micrometer
- c) Safety Belt
- d) Full harness belt
- e) Hand operated and hydraulic operated crimping tool.
- f) Welding generator set.
- g) Portable grinder
- h) Portable drill

b) For Class 1 : Testing Instruments

1. Insulation Tester
(a) 1000V (b) 500 V class each
2. Portable Voltmeter - range 0 to 600 volts.
3. Portable Ammeter – range 0 to 60 A.
4. Multi meter
5. Tong Tester
6. Earth Tester with testing accessories.
7. Phase sequence meter

Safety Tools and other Equipments:

- a) Rubber hand gloves tested to 15 kV (Electrical grade)
- b) Wire gauge or micrometer
- c) Safety Belt

and Library for relevant Acts, Rules and BIS Publications

Wiring Instruments and Equipments.

c) For Class 2 and 3 :

Testing Instruments

1. Insulation Tester 500 V class each
2. Portable Voltmeter - range 0 to 600 volts.
3. Portable Ammeter – range 0 to 60 A.
4. Multi meter
5. Tong Tester

Safety Tools and other Equipments:

- a) Rubber hand gloves tested to 15 kV (Electrical grade)
- b) Wire gauge or micrometer

and Wiring Instruments and Equipments.

ANNEXURE - 5

FEES

Sl. No.	Particulars	Fees
A	FRESH (FOR ONE YEAR):	
1	Licence to Electrical Contractor Super Grade	10,000/-
2	Licence to Electrical Contractor Class 1	3,000/-
3	Licence to Electrical Contractor Class 2	2,000/-
4	Licence to Electrical Contractor Class 3	1,000/-
5	Special wiring permit to Industry (LSWP)	10,000/-
