

PROCEEDINGS OF THE GOVERNMENT OF KARNATAKA

Sub: Power Generation by Industrial Units through Captive Generation sets - extending concessions - reg.

READ

Government Order No. DE 97 PPC 92 dtd. 08.06.1992.

PREAMBLE

Due to failure of monsoon in the catchment areas of Hydel Generating Stations in Karnataka the availability of Energy in the State has been drastically reduced. As against the daily availability of around 38 MU units from Hydel Stations in good monsoon year, the availability of Energy from these sources for the balance period from today till the end of June 1996 is only 20 MU units due to which the Government was forced to introduce Power Cuts and shedding of loads w.e.f. 3rd Nov. 1995.

Government is aware about the hardships faced by the Small, Medium and Large Industries. Most of the industries have installed captive power generation sets based on liquid fuels such as Diesel, LSHS, Furnace Oil etc. Government has considered the hardship faced by the Industrial Sector sympathetically and has, therefore, decided to extend certain facilities to the Industries who have installed Captive Power Generating (CPG) sets to augment power to their industries.

ORDER NO. DE 210 EEB 95 BANGALORE, DATED 23RD NOV. 1995.

Government are pleased to order for the extension of the following concessions to the Industries who are generating power through their CPG sets.

a) All CPG sets installed by the industrial units, irrespective of the date of installation, based on liquid fuels such as Diesel, LSHS, Furnace Oil, etc. would be exempt from payment of Electricity Tax upto 30th June 1996.

b) All CPG sets irrespective of the date of installation of such sets, would be exempt from payment of Sales Tax on Diesel and other liquid fuels such as LSHS, Furnace Oil, etc. upto 30th June 1996.

c) Benefits at (a) & (b) above would be available to all industrial units which are certified to be eligible for the same by the Department of Industries and Commerce/Chief

Electrical Inspectorate with necessary documentary evidence;

d) All industrial units having CPG sets in excess of 500 KVA would be permitted to supply surplus power, if any, to other industrial units through the KEB grid, subject to condition that the industrial units pay necessary service charges to KEB for wheeling and banking as per rules.

e) Industrial units intending to install new CPG units would be given financial assistance on priority by the State Financial Institutions, namely, KSFC & KSIIDC.

f) Industrial units desirous of installing new CPG units would be given necessary 'No Objection Certificates' by the Chief Electrical Inspectorate expeditiously and the unit may only inform KEB regarding the details of the CPG units without having any need to obtain permission from KEB and,

g) To the extent feasible, power cut would be suitably staggered and some relief given to continuous process industries.
